INTRODUCING THE EVO165D

Experience the Evolution

The EVO 165 represents everything that's evolutionary in a chipper. GreenMech listened to the industry and used all their design and manufacturing experience to develop the machine that will deliver exactly what you've been looking for.

More aggressive torque
More aggressive bite
More throughput

KEY FEATURES:

CAPACITY:	6" / 165mm
ENGINE:	Kubota 25hp
FUEL:	Diesel
HYD FEED ROLLERS:	Twin horizontal
POWER CONTROL:	No Stress
TONNES PER HOUR:	4.25
WEIGHT:	1000 Kgs

BGM SPECIAL
£14,995
FINANCE AVAILABLE

Compliant Diesel Engine

The Stage 5 compliant diesel engine provides useable power matched to operational needs whilst retaining fuel economy

Horizontal Rollers

Gather and grip the material whilst offering a smooth flow into the processor with reduced lateral movement

3 Year Warranty as Standard

GreenMech offer an industry-leading 3 year unlimited "no quibble" parts and labour warranty

PTO CHIPPERS

ECO 150 TMP PTO 6" CHIPPER

URNS YOUR TRACTOR INTO A HIGH OUTPUT CHIPPER

Maximising the capability of your compact tractor fleet, the ECO150 PTO chipper is a very cost-effective solution. It is a three-point linkage mounted machine, powered by the PTO shaft of the compact tractor to drive the flywheel, while the tractor hydraulics are used to control the feed rolls. It has the same inner dimensions, in-feed opening and flywheel as the popular Arborist 150 and can be driven by tractors with up to 45 PTO HP.

The Eco 150 TMP is typically used in landscape, golf course and large estates where compact tractors are employed to carry out a wide variety of duties.

OUR PRICE
£6,750

3YR
WARRANTY
AS STANDARD

CM 220 TMP PTO 9" CHIPPER

WIND UP THE HORSEPOWER!

If tractor horsepower of up to 80hp is available and you want to get maximum chipping output for minimum investment, then take a look at the ChipMaster 220 TMP. With a high throughput of materials this machine will take virtually everything you can throw at it. The chipping system consists of the renowned 'Disc-Blade' technology which allows rotation of the cutting edge and extends the sharpening period to only once in approximately 150 hours. This is a feature that reduces downtime, cuts maintenance, reduces labour costs and maximises working performance. As with all GreenMech chippers maintenance is very minimal, with a few grease points and a daily check-over and another big plus with GreenMech chippers is that they run quiet and are less likely to cause issues with noise pollution.

OUR PRICE
£10,895

FINANCE AVAILABLE

CS100-18E Powerful, Effective & Value For Money

KEY FEATURES:

- 4 inch chipping capacity
- 18hp B&S Vanguard v-twin petrol engine
- Twin reversible chipping blades
- Adjustable discharge chute
- Optional trailer

3YR
WARRANTY
AS STANDARD

BGM SPECIAL
£4,020

GreenMech Unique Disc-Blade System

Outstanding disc-blade system which can give up to 120 hours chipping before re-sharpening and up to 900 hours before replacement.

No Stress Control and Hydraulic Feed Rollers

The twin hydraulic feed rollers powerfully crush woody material. These rollers are governed by the advanced No Stress control system, giving effective throughput management which helps to prevent blockages.

CHIPPER HIRE	1 Day	3 Day	Week
GreenMech Arborist 150	£150	£250	£300

*Please note CS100-18E chipper model is not available for hire.

All prices exclude VAT.

At Burnley FC's Barnfield Training Ground, the Premier League club's first order for John Deere machinery from local dealership Balmers GM has bedded in at what is reportedly Britain's first football facility of its kind.

The 10ha Barnfield site includes 15 pitches altogether, including four full-size Desso and a 60 x 40m goalkeeper area in the first team zone, plus three and a half full-size Fibresand surfaces and two full-size natural soil pitches (topped up with sand over the years) in the Academy areas. The site also includes a full-size outdoor Desso 3G and indoor Desso 60 x 40m 3G. All pitches are split up into sizes appropriate for different age ranges and all feature full drainage, with Rainbird irrigation systems throughout the site.

Head groundsman Barry O'Brien leads a nine-strong team and has witnessed plenty of changes in his 11 years here, the latest his own doing. After lengthy spells specifying other major turf machinery brands, Barry thought it was time to try John Deere. Following extensive trials, he specified the equipment required to cope with exacting conditions both outside and indoors.

The new tractor and mower fleet meets fresh demands that are centred on changing turfcare practices at the ground. For example, gone is the early 'fluffy' cut after the team fitted different rollers and adopted a more aggressive maintenance regime of raking out and brushing. "We had a grass factory here, generating far too much growth," says Barry. "It would challenge any kit, but we're fine now after adapting the way we do things."

Balmer's golf & turf area manager Andrew Meeks, whose family are Clarets fans (although he supports Liverpool!), agrees: "We've grown with each other over the years, so it was just a question of responding to Barry's needs and supplying them, while working closely with the team to

deliver the results they wanted." Barry adds: "In doing that, we've developed a trusted relationship that has also helped us to expand our knowledge base."

John Deere's all-purpose X950R commercial lawn tractor with rear collection has been proving a deal-maker nationally, and Barry O'Brien's assessment is no exception. "The machine is very good at sucking up pitch debris across the site as well as leaves off our top pitch, which lies next to National Trust woodland," he says.

"The X950R is one of the best of its kind anywhere, and fits perfectly into the different approaches our grounds team is taking with football pitches – lighter rolling, clearing out and raking. Also, it stands the grass up so that cutting is more effective and reduces the risk of matting. We'd like another one of them, especially fitted with slick tyres."

Barry also sees the value of his three 7700A PrecisionCut cylinder mowers in this environment. "They serve the football application just as well as they do golf. Obviously the sports differ, but in many ways they lend themselves to similar machinery applications. The customised grass boxes and nylon rollers are also major benefits."

With Burnley manager Sean Dyche casting an eagle eye over pitch presentation, the last thing needed is turf machinery making the wrong impression. Used for heavier duty tasks such as hauling sprayers and fertiliser spreaders, the John Deere 4049R compact tractor sports Galaxy turf tyres that fit the bill for the bigger pitches, leaving the manager with little cause for complaint. "He loves the softer tyres – they have a big footprint but leave no imprint on the turf," says Barry.

Additional 1026R and 2036R compact tractors serve as all-rounders, moving indoors to pull drag brushes and other kit that the team uses to maintain the Desso cross-knit pitch. As Barry adds: "It's not just about the machinery but what you do with the turf between times that allows you to achieve the best results and benefits. That said, I saw the brilliant back-up we were getting from Balmers and the team's confidence in the kit, and knew the combination would win through."

GET PREPARED FOR THE WINTER SEASON

SNOWEX SPREADERS ARE BUILT TO BE TOUGH

In-cab control units provide precise operation of spinners and augers, combining quality with accuracy, and enabling operators to prevent over-spreading and material wastage.

SP-575 & SP-1575 UTILITY SPREADERS

Designed specifically for the UK and European markets, the highly versatile utility spreader, which can be used in a variety of applications thanks to a wide range of mounting brackets available to suit commercial vehicles and 4x4's, utility vehicles, tractors, forklifts and even a trailer mount for use behind an ATV.

**SP-575
£2,230**

**SP-1575
£3,155**

SP-6000 V-PRO SPREADER 800LTR

The rugged SnowEx SP-6000 V-PRO mounted spreaders offer a revolutionary breakthrough in snow and ice control technology. With the hoppers entirely constructed of heavy duty polyethylene, V-PRO are considerably lighter than steel 'vee boxes'. Contractors with medium to large sized areas to maintain will appreciate the SP-6000's huge 800 litre capacity hopper and of course, all the other usual SnowEx V-Pro benefits such as reliable 12V power, independent spinner and auger control and light yet strong polyethylene hopper.

**SP-6000
£5,990**

VX-1500 V-MAXX SPREADER 1200LTR

The V-MAXX is the undisputed champion of spreading. Built to uncompromising standards with proven reliability in the most demanding environments, the spreader of choice for local authorities, highway maintenance contractors and commercial applications across the UK and Europe.

Comes complete with the VMT-250, which is fully road legal, with lights, overrun brakes, full suspension and hand brake, plus the usual SnowEx benefit of controlling spread patterns from the cab is retained, as a boom extension kit is included with each trailer. And the added bonus is that a vehicle tachograph is not usually required.

**VX-1500
£6,850**

All prices exclude VAT.

BCS SNOW CLEARING MACHINERY

**ALSO
AVAILABLE
TO HIRE**

If you are responsible for ensuring access at commercial premises, our BCS snow clearing machinery will help you to keep things moving, easily clearing snow up to 40cm (16") deep.

The BCS range is robust and versatile operating front-mounted attachments which are ideal for clearing car parks, footpaths, access roads, sports pitches - in fact anywhere!

And with over 30 attachments available, BCS Snow Clearing Machinery isn't just for clearing snow, it can be used all year round to cut grass, rotavate and much more.

Choose from petrol or diesel engine power units, each of which can operate a Snow Blower, Snow Brush and Snow Plough.

BCS SNOW PLOUGH

Mont Blanc Pedestrian Spreader

£675

THE MONT BLANC SPREADER FROM GRITEX IS OUR BIGGEST SELLING PEDESTRIAN SPREADER AND SUITABLE FOR ALL SALT OR GRIT TYPES INCLUDING THE DAMP COUNCIL SALT TYPES. IDEAL FOR DE-ICING LARGER AREAS INCLUDING SCHOOL PLAY GROUNDS, WALK WAYS, CAR PARKS AND PEDESTRIAN AREAS.

All prices exclude VAT.

Fuji Towable Spreader

£1,795

THE FUJI TOW BEHIND GRITTER IS A ROAD LEGAL AND FITS ON A STANDARD TOW BALL HITCH. IT IS OPERATED BY THE ROAD WHEELS WITH THE POWER TRANSMITTED THROUGH A TOUGH ENCLOSED GEARBOX WHICH OPERATES THE SPINNER. SIMPLY CONNECT THE GRITTER TO STANDARD TOW BALL HITCH, PLUG INTO STANDARD LIGHT CONNECTOR AND ITS READY TO GO.

LEAF BLOWERS FOR GOLF COURSES, SPORTS FIELDS AND MUNICIPAL SURFACES

The Wiedenmann range of leaf and debris blowers are perfectly suited for a range of commercial applications. With the unique, patented swivel mechanism, the leaf blowers can be swivelled with only one hydraulic cylinder or electric spindle. This continuously blows the leaves and other materials in the same direction without driving backwards. Efficient all-round work from left to right is also possible without turning manoeuvres.

The air nozzle is vertically adjustable so that the air stream can be appropriately adapted to your job, and the large support wheels always provide effective ground adaption even on tricky terrain.

Make the most out of your John Deere machine this Winter with our range of snow clearing equipment.

Whether you have a front mower, a mowing tractor, a compact tractor or Gator, we have a solution to help you quickly and efficiently remove everything from a light dusting to heavy snowfall from footpaths, car parks and driveways.

Contact the Balmers Sales Team for more information.

SNOW BLADES FOR FRONT MOWERS

Can easily be fitted to your front mower for added versatility.
(Not available for all front mowers)

SNOW BLADES FOR X SERIES TRACTORS

54" and 60" snow blades to fit your John Deere X700 and X900 series tractors.

SNOW BLADES FOR COMPACT TRACTORS

54", 60" and 72" snow blades to fit your compact tractor.

SNOW BLADES FOR HPX/XUV GATORS

72" V-front blade with 3 position manual angling.

All prices exclude VAT.

TREAT YOUR AUTO-MOWER TO AN ALL-INCLUSIVE WINTER STAY AT BALMERS GM!

We will collect your robotic mower, service and store it in a dry and heated environment over the Winter season and then when Spring arrives we'll make sure that your machine is fully charged, ready to deliver and re-install back at your home / premises now that the grass has started to grow again.

ALL-INCLUSIVE AUTO-MOWER SERVICE

£199

- The latest software updates
- Electronic diagnostic (auto-test)
- Cleaning / washing
- Blade replacement
- Battery functional test (auto-test)
- Battery charging
- Safety functions test
- Functional check
- After the service you will receive a detailed service checklist report

As well as the service items above, Balmers GM will collect, store, return and re-install at your home / premises.

BALMERS BASIC AUTO-MOWER SERVICE

£99

If you want to store your Auto-Mower yourself, we recommend that you bring it into Balmers GM for a service beforehand.

Once serviced, It's important that you keep it in a dry environment above freezing point as dirty robotic mowers that are stored in cold and damp environments will have a significantly shorter service life. It is highly recommended that you also store the charging station indoors over the winter.

All prices exclude VAT.

OUR GUIDE TO GRINDING

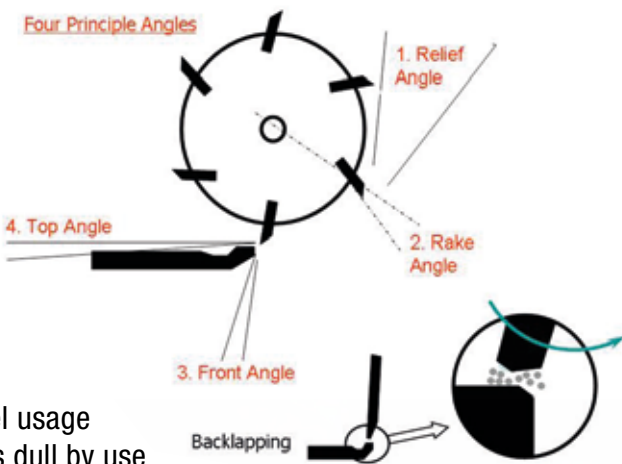

Balmers recommend a two phase grinding strategy for your cutting units. A full relief grind when the machine is serviced through the winter months and followed up with a mid-season spin grind to keep cut quality throughout the season for maximum efficiency.

Relief Grinding

Relief grinding removes metal from the trailing edge of the blade forming an angle (relief angle) to reduce the contact area of the cutting edges. This reduces blade area resulting in less friction.

So why relief grind?

- Ensures longer wearing part life
- Less time required to back-lap
- Reduce pressure to cutting surfaces resulting in less hydraulic power required, lower engine load and reduce fuel usage
- Reduces squeezing and tearing of the grass as the unit gets dull by use

Can I just have a spin grind?

Yes, of course! Every cutting unit service requirement is different and depends on the application. A mower cutting rough grass for a local authority will clearly have a different grinding and set-up to one that is mowing a tee on a golf course. A spin grind takes less time and costs less money whilst still giving the cutting surfaces a freshen up and can be done without stripping the unit down.

VLC5501 VAPORMATIC IMMOBILISER

The Vapormatic Vehicle Immobiliser is a robust, secure, yet easy to use keypad system that provides the ultimate solution for securing your machinery - even if the keys are in the ignition! Making machinery theft a non-starter for criminals.

£350

MCXFA1650 BATTERY CHARGER

A "connect and forget" peace of mind solution for out of season use. Developed for the charging and maintenance of smaller capacity batteries up to 32Ah especially ATV's, ride on mowers and motorcycles. It will however provide maintenance charge for larger batteries up to 100Ah.

Fully automatic, multi-stage charging cycle, - easy to read LED monitor, spark proof and reverse polarity protection. Supplied with quick connect eyelet cable and battery clamp cable.

£25 (RRP: £46.50)

MCXFA1652 BATTERY CHARGER

A fully automatic maintenance charger with boost start facility. This unit provides 6 and 12Volt detection, 3 rates of charge and microprocessor controlled for maximum performance. Digital and LED display allow easy monitoring of battery status or selection of individual rates of charge.

Fully automatic, auto voltage detection 6-12V, 3A-5A-20A charging rates, battery size dependant, 150A Engine boost start, multi-stage charging cycle, easy to read LED/digital monitor, Spark proof and reverse polarity protection.
